

SEPARATING PEOPLE FROM HAZARDS

Facility Safety Solutions

Safety Systems for the Rail Sector

Kee Safety: A Global Leader in Safety Systems for the Railway Industry

Established in 1934, Kee Safety has been a preferred safety partner to the railway industry for over 85 years.

We are a global leader in intelligent safety solutions, supplying innovative components and custom systems for hand railings, guardrails, roof edge protection, fall protection and safe access equipment. Kee Safety has supplied and installed safety barrier and fall protection systems across thousands of miles of rail networks.

We constantly set industry standards and our solutions continue to save countless lives. **“Separating people from hazards”** - this is the simple philosophy that drives Kee Safety.

Fibreglass, Non Conductive
Platform Solution

PitProtect Ontrack

Expanding Inspection Pit Protection

PitProtect Ontrack has been designed to keep operatives safe by preventing falls into inspection pits and voids when servicing trains and carriages. Each frame comes in 2 metre lengths and works with our standard PitProtect.

PitProtect Ontrack is constructed from aluminium and has a concertina design, making it easy to open and close. The system is lightweight but strong enough to support an operative's weight. PitProtect Ontrack can be used as a working platform.

Kee Track® Overhead Rigid Rail

Fall Protection for Loading and Manufacturing

In many facilities there is a need to access the top of trains and carriages for maintenance. Kee Track® offers dependable safety and short fall arrest distances when loading and working on top of mobile equipment.

Fixed to the ceiling with a unique range of mounting options, Kee Track is designed to maintain an open floor plan using structurally-mounted, low-profile rails that maximize work zones.

Post Shield™

Simple, Effective Way to Eliminate Damage

Bollards have been around a long time for a reason: they work! Bollards are simple and can be installed just about anywhere to protect just about anything. Bollards are available with added features such as guardrail intermediates.

Traffic Shield™

Protecting People from Dangerous Collisions

Traffic Shield is an industrial guardrail that protects people from facility equipment. Traffic Shield is available with a variety of options including: lift-out sections and swinging-out sections.

Pitboard

Adjustable Working Platform for Rail Tracks

Highly visible, strong – 500kgs SWL – and easy to install, our aluminium pitboards offer the perfect solution for a safe working environment.

The pitboards feature adjustable brackets that enable them to fit any pit, this eliminates the need for a number of different pitboards, ensures they are fitted correctly and therefore are safe to use. They can also be left in position whilst rolling stock is using the rail track.

Kee Klamp® Modular Railing

Easy to Install Compliant Railing for Mezzanines

International regulations specify that any fall distance can pose a serious danger. The safest method of providing protection is separating people from fall hazards with railing. Kee Klamp® Modular Railing protects people from falling from mezzanines and other elevated surfaces.

Bespoke Engineered Platform

Working at Height Custom Solutions

The size and location of services on trains means that many tasks have to be conducted whilst working at height. Our bespoke train maintenance platforms are custom made from aluminium, as it is a strong, lightweight and versatile material. We offer a huge range of configurations using a wide variety of profiles and extrusions for your specific requirements.

Kee Platform®

Providing Access without the Risk

Kee Platform® can be designed to reach complex places with ease. Made from modular Kee Klamp components, our access platforms can be designed to suit any task with minimal disruption to existing work processes.

Bespoke Storage Solutions

Freestanding and Wall Mounted Storage

Our bespoke storage solutions come in a range of different sizes and are available in the form of free standing and wall mounted, depending on the scenario.

Rail Ramp

Helping you Board Safely

Rail Ramp provides wheelchair accessibility for trains and other forms of public transportation. Durable and lightweight, Rail Ramp is designed to suit the specific gaps of stations and rolling stock.

Kee Klamp® Handrail

Compliant Support and Stability for Safe Access

Our Kee Klamp® Handrail is the ideal fall protection solution for stairs, ramps and sloped surfaces. Made of galvanised cast iron components, our systems are highly durable, exceeding BS, EN and OSHA regulations and compliance so you can be assured your safety railing meets all the relevant codes.

Kee Klamp® Guardrail

Keeping you safe on the Ground

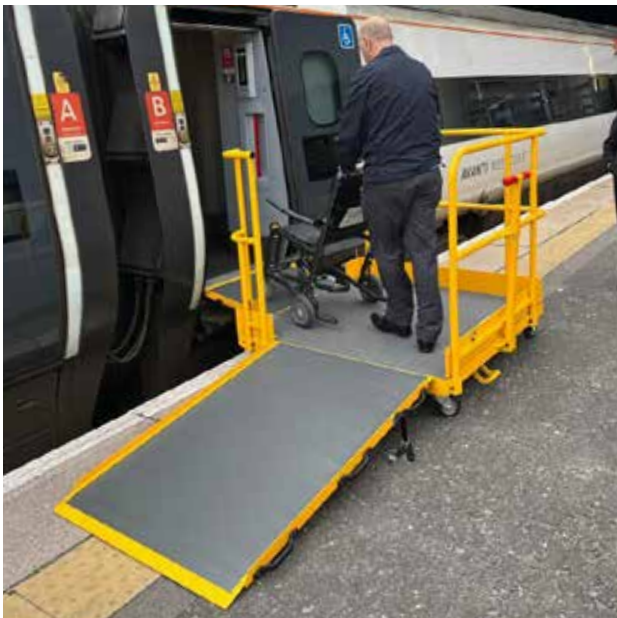

Kee Klamp® Guardrail is used at the perimeter of an edge or fall hazard and acts as a barricade or protection against the fall. The guardrail can accommodate toeboards, in-fill panels, or safety gates, while exceeding world class safety standards. Kee Klamp® Guardrail is modular so it can be easily configured and installed precisely to your needs.

Kee Access®

Safe Access Modular Ramps

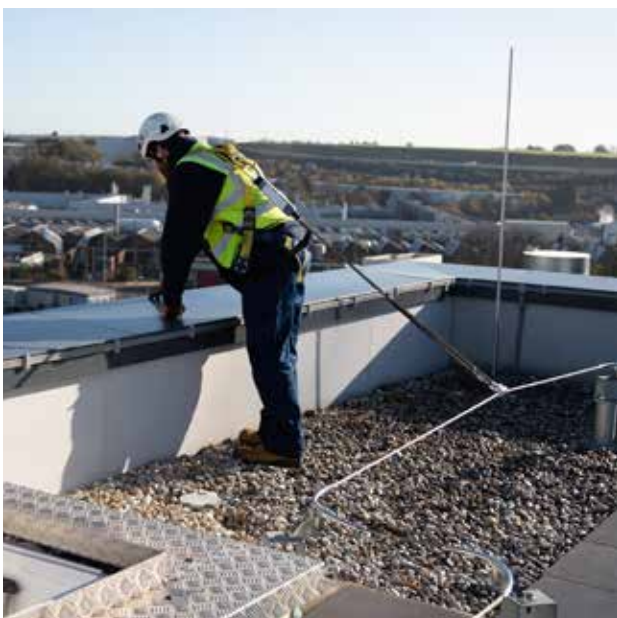

Kee Access® is a modular ramp that can provide safe, compliant access. It offers a method of granting secure access to railway stations without the necessity for significant alterations to the current building. Kee Access has been designed to meet disabled access standards in the US, UK, Europe and the rest of the world.

Mobile Platform Ramp

Helping Passengers Board in Tight Spaces

The Mobile Platform Ramp is a compact solution comprising of two ramps and a platform surface. It is designed to help people with reduced mobility alight trains on station platforms whilst overcoming the obstacle of narrow platform widths, providing sufficient turning circle.

Kee Line® Horizontal Lifeline

Fall Protection for Rooftop Workers

The Kee Line® horizontal lifeline system is designed to provide workers with freedom of movement on the rooftop while securely attached to the lifeline at all times. The energy-absorbing features of Kee Line make it suitable for use on roofs, ceilings, and other structures.

Kee Walk® Roof Walkway

Enabling Safe Rooftop Access

A modular roof walkway system that's easy to install and designed to meet and exceed relevant international safety standards. Available in nylon and aluminium treaded options. Kee Walk® provides a safe, anti-slip, level walkway for workers who need to access a roof in the course of their work.

Its intelligent design protects the roof surface from unnecessary damage and integrates easily with either guardrails or lifeline systems.

Kee Gate® Self-Closing Safety Gate

Access Point Entry Protection

A fully adjustable range of self-closing safety gates for use in rooftop or industrial environments. Kee Gate® safety gates are ideal for protecting any openings, ladder/stair access points, roof hatches, walkways, and access to industrial machinery.

Trackside Platform

Fibreglass, Non Conductive Platform Solution

Fibreglass is lightweight, strong, non-conductive, and spark/chemical resistant making it perfect for offshore, food, rail, or conservation sites.

We developed our Protec fibreglass systems so that it is specifically engineered to go into situations where a metallic access solution cannot be used.

Evacbridge

Train-to-Train Bridging Solution

When trains become stranded on the network, the controlled train evacuation of passengers from trains must be done in a safe manner. Evacbridge® is the leading Train-to-Train bridging solution that makes this possible.

Evacbridge is lightweight and compact with a small storage footprint. It also conforms to manual handling regulations, making it portable and quick to deploy, and is telescopically adjustable to suit different spans.
